

Thermische Analyse Dag 2002

The "Thermische Analyse Dag 2002" was organised on Friday November 29, 2002 in Postiljon Mercure Hotel Bunnik. The event was sponsored by TA Instruments Benelux.

The TAD-2002 was attended by 45 persons. The programme (see below) was varied and interesting.

- 9.00 Welcome / coffee.
- 9.30 Opening by the president of the TAWN, dr. Paul van Ekeren.
- 9.45 Els Verdonck (TA Instruments Benelux): *Advantages of T-Zero DSC technology for materials characterisation*
- 10.30 J.G.P. Goossens, A. Saalbrink, H.E.H. Meijer and P.J. Lemstra (Dutch Polymer Institute/ Dept. of Chemical Engineering, Eindhoven University of Technology): *Processing of intractable polymers using reactive solvents: The use of modulated DSC to follow structure development.*
- 11.00 Coffee break.
- 11.20 René Hoekstra (DSM Pharmaceutical Products): *The use of high pressure pans in practice.*
- 11.50 Mark de Vries (DAF Trucks): *DAF & Chemistry.*
- 12.20 Lunch.
- 13.15 Vincent Mathot (DSM Research, KU Leuven en Dutch Polymer Institute): *Thermal Analysis & Calorimetry beyond 2000: New routes for applications in metastable polymeric systems.*
- 14.15 Erik Bevers, Paul van Ekeren and Wim Haije (Utrecht University and ECN): *The use of lithiumchloride ammoniates in a heat transformer: a study using a pressure DSC.*
- 14.45 Tea break
- 15.05 Frieder Dreisbach (Rubotherm Präzisionstechnik) and Piet Luksemburg (Benelux Scientific): *Application of Magnetic Suspension Balances.*
- 15.35 Annual meeting for the members of the TAWN.
- 16.20 Closure.
