

# Thermische Analyse Dag 2008

The "Thermische Analyse Dag 2008", the annual symposium of the TAWN, took place on Friday, November 28, 2008.

The sponsor of this day was Ankersmid B.V., representative of Linseis instruments.

We are very honoured that Mike Reading presented a lecture during the symposium.

Location:

Huize Bergen

Glorieuxlaan 1

5261 SG Vught

(tel. 073-6579124)

## Program of TAD-2008

- 09:30 Reception with coffee / tea
- 10:00 Opening by the president of the TAWN
- 10:05 Peter Veth (Ankersmid B.V.) – Welcome on behalf of the sponsor
- 10:10 Claus Linseis (Linseis Messgeräte GmbH) – “New developments and interesting applications using thermal diffusivity, conductivity, high pressure STA and dilatometry”
- 10:40 Jan van Humbeeck (Katholieke Universiteit Leuven) – “Thermal Analysis, a tool to study reversible and irreversible processes in metals and ceramics”
- 11:05 Coffee / tea
- 11:25 Presentation of the "TAWN travel scholarship for young scientists" by the president of the TAWN to Mrs. Sandrien Janssens
- 11:35 Sandrien Janssens (Katholieke Universiteit Leuven) – “Phase analysis and miscibility of itraconazole and polyethylene glycol / hydroxypropylmethylcellulose blends prepared by spray drying”
- 12:05 Mike Reading (University of East Anglia Norwich, UK) – “Thermal Methods on the Nano-scale”
- 12:50 Lunch
- 13:50 General assembly of the TAWN
- 14:50 N. Watzeels, C. Block, H.E. Miltner, G. Van Assche, B. Van Mele en H. Rahier (Vrije Universiteit Brussel) – “Assessing the degree of nanofiller dispersion in poly(e-caprolactone) nanocomposites by dynamic rheometry and MTDSC”
- 15:15 Tea / coffee
- 15:35 Crisan Popescu (RWTH Aachen) – “The beauty of the hair and the DSC”
- 16:05 Wim de Klerk (TNO Defensie en Veiligheid) – “History of microcalorimetry”
- 16:30 Closure by the president of the TAWN
